Rezaul Karim Rifat

Full-Stack Web Developer

Dhaka, Bangladesh | rezaul2002104@gmail.com | +880 1722292603

GitHub | LinkedIn | Portfolio

Professional Summary

Full-Stack Web Developer with hands-on experience building and deploying full-stack web applications using Next.js, React, TypeScript, Node.js, Express, Django REST Framework, and MongoDB. Skilled in designing REST APIs, implementing JWT-based authentication, and building responsive, component-driven interfaces with Tailwind CSS. Passionate about clean architecture, secure data flow, and delivering user-focused products. Recent graduate actively seeking a full-stack developer role.

Technical Skills

Languages: Python, JavaScript, TypeScript, HTML, CSS
Frontend: React, Next.js, Tailwind CSS, Bootstrap, shadcn/ui
Backend: Node.js, Express.js, Django, Django REST Framework
Database: MongoDB, Mongoose
Auth & Security: Better Auth, JWT, JWKS verification, role-based access control
Tools: Git, GitHub, Postman, Vercel, Netlify, REST API

Projects

Wanderlust — Full-Stack Tour Booking Platform — Live Demo | GitHub

- Built a tour package booking app with a Next.js/TypeScript frontend and a separate Express/MongoDB API.
- Verified Better Auth JWTs in the Express API via its JWKS endpoint and restricted destination CRUD to admin users.
- Protected profile, bookings, and destination pages with a proxy that redirects signed-out users to sign-in.

Bazar-Sodai — Online Grocery E-Commerce — Live Demo | GitHub

- Built a grocery storefront connecting a React frontend to a Django REST Framework backend.
- Wrapped order creation in a single transaction and recalculated line totals from database prices, preventing client-side price tampering.

Bazar-Dor — Price Tracking Application — Live Demo | GitHub

- Built a price-tracking app with Next.js, TypeScript, MongoDB, and Better Auth.
- Used Next.js `'use cache'` on homepage product sections and derived min, max, and average prices from raw market rows on detail pages.

Fit-Log — Workout Tracking App — Live Demo | GitHub

- Built a workout tracker in Next.js and TypeScript to browse workouts, view details, and save routines.
- Consolidated today's plan, saved workouts, and completed IDs into a single React context shared across library, detail, and plan views.

Bangla News 24 — News Portal — Live Demo | GitHub

- Built a categorized news portal in Next.js and TypeScript with Better Auth.
- Rendered the API's mixed article body as typed text, subheading, and image blocks instead of flattening it to plain text.

Django Blog App — Blogging Platform — Live Demo | GitHub

- Built a Django blog with post CRUD, reactions, and comments.
- Generated each slug from the title plus a UUID so duplicate titles still get unique, shareable URLs.

Book Vibe — Book Management App — Live Demo | GitHub

- Built a responsive book management app with Next.js, TypeScript, and Tailwind CSS.
- Enabled users to explore books, manage Read and Wish Lists, sort saved books, and visualize reading progress.

Education

Jahangirnagar University — YEAR – 2025
B.Sc. in Statistics and Data Science

Additional

- Actively developing full-stack web development skills through practical, deployed projects.
- Experienced with component-based development, REST API integration, and JWT-based authentication.
- Comfortable working independently and learning new tools quickly.
